

# UK Concrete Show – Best New Product Nomination

## **Towergate Toolbox**

Towergate Toolbox – It's new, brand new, and makes its first public appearance at the UK Concrete Show.

### **What makes Towergate Toolbox special?**

All vehicle dependent businesses like the idea of getting control of their insurance costs, but not everyone has made the conceptual leap from shopping around for the cheapest quote, with all the challenges and shortcomings that can often come with it, to one in which risk management takes centre stage. Many of the larger fleet operators have, however, and are already beginning to enjoy the additional influence that they can exert in reducing their operational risks, claims and costs. The cost of investing across a range of risk management tools has however deterred smaller operators from making the same commitment.

### **No longer!**

Towergate Toolbox provides smaller fleet operators with a subsidised way of accessing a range of practical tools and advice. Tools and advice that will help them take initial steps towards embedding a risk management approach to sustainable insurance premiums within their businesses. It provides a perfect foundation for them to then continue the risk management journey through the FORS Bronze, Silver and Bronze Accreditation Schemes should that be their ultimate goal - the importance of which, and the benefits they provide in distinguishing one business from another in an increasingly competitive, safety conscious and environmentally friendly market, cannot be underestimated.

Packed with tools like dashcams; driver training, driver profiling and licence checking; accident packs, first aid kits and vehicle decals; Toolbox also includes access to the [www.towergateriskmanagement.com](http://www.towergateriskmanagement.com) online portal, where operators can access an extensive range of HR and Health & Safety advice and documentation on a 24Hr basis.

Subsidised by Towergate and a number of supporting Insurers, who will look favourably on those who buy into risk management and then use the tools to demonstrate an improving claims history, Towergate Toolbox it is delivered by Towergate's expert risk and claims management teams and through Safedrive, its specialist Driver Risk Management brand.

As the saying goes, "Give a man a fish and he'll eat for a day. Teach him to fish and he'll eat for a lifetime". Just so for those wanting a route to sustainable insurance solutions!

If you've missed Towergate at the show (stand D1) but would like further information on Towergate Toolbox, you can contact them on 0334 892 6219
