# HOW TO SECURE YOUR PERSONAL DEVICES

towergate

From tablets, smartphones and laptops, to video doorbells and baby cams, there's a goldmine of personal and business data on our devices. That's why it's more important than ever to secure your personal data.

THE RISKS OF NOT SECURING YOUR PERSONAL DATA

Failing to secure your personal data can leave you vulnerable to cyber-attacks. Once someone gains access to your personal data, you have no control over it. It could be shared and distributed to anyone, used to blackmail you or even to commit illegal activities.

HOW TO SECURE YOUR PERSONAL DATA

Step 1: Lock down your device

Step 2: Ensure to install the latest updates

Step 3: Only download software from brands you trust

Step 4: Disconnect from tracking features when not in use

Step 5: Back up your phone

Step 6: Ensure you can track and wipe your device

Step 7: Install anti-virus and malware protection

Step 8: Keep up to date with the latest cyber threats

Step 9: Dispose of old personal devices securely
